
IFU ANIEMEKA

PROFILE

I'm a software engineer with 4 years of experience building web applications. Behavior-driven development is my jam.

EXPERIENCE

SCHOLAR, OPENAI; JUNE 2018 - PRESENT

Studying machine learning under the tutelage of an OpenAI researcher. Crafting a final project to train a model to gain an intuitive sense of the physics of moving objects.

DEVELOPER, HASHROCKET; CHICAGO, IL – 2017 - 2018

Crafted software for my clients and wrote blog posts on topics that interest me.

JR. SOFTWARE CONSULTANT, DEVMYND SOFTWARE; CHICAGO, IL – 2015 - 2017

I built custom software solutions for clients in various industries, including education, healthcare, and agriculture. Most of my work was developed collaboratively, namely, in a pair programming setting. I was also the organizer for DevMynd's OpenHack Meetup group.

SOFTWARE APPRENTICE, DEVMYND SOFTWARE; CHICAGO, IL – 2014-2015

I paired with senior developers to sharpen my skills in areas such as test-driven development and writing code that aligns with best practices. Along the way, I learned the essentials of agile software development. I also gained greater exposure to the open source world.

FULL-STACK DEVELOPER, MAKERSQUARE; AUSTIN, TX – 2014

MakerSquare (now called Hack Reactor) is a 12-week, intensive program that trains students to become full-stack web developers. While there, I learned Ruby and JavaScript, software design principles, and practical applications of algorithms.

EDUCATION

PRINCETON UNIVERSITY, PRINCETON, NJ – B.A., PHILOSOPHY, 2011

SKILLS

HTML, Sass, JavaScript, Python, Ruby on Rails, RSpec, PostgreSQL, Jupyter Notebook, pandas, Tensorflow
